Coatings

Complete Your Lenses

Protection in all conditions.

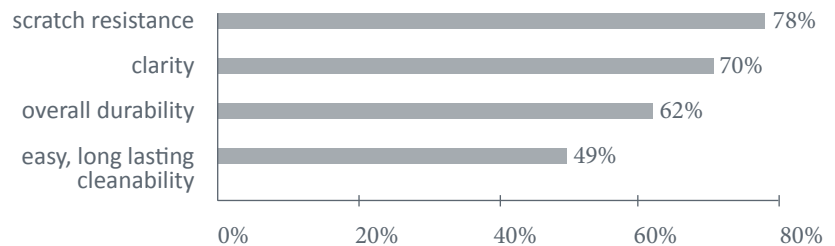

Coatings. Your lenses perfectly protected under all conditions.

Recent market research shows the importance of coatings as a part of the total lens package. Wearers are demanding ...

- ▶ Superior scratch resistance.
- ▶ Great clarity.
- ▶ Overall durability.
- ▶ Easy, longer-lasting cleanability.

Most important lens features to wearers:

Source: Image and Awareness Tracking conducted by an external market research institute. The study included 6,000 spectacle wearers in eight countries around the world.

The **synchrony portfolio** offers two AR coatings for different levels of patient needs.

The synchrony® **AR** portfolio delivers tailored and reliable solutions for the individual needs and wants of every wearer:

- ▶ HMC+ lenses feature an Anti-Static layer and a superior Super-Hydrophobic layer for easy, longer lasting cleanability.
- ▶ HMCX provides an additional level of scratch protection improving the longevity and overall durability of the lenses.

EFFICIENCY AND VALUE PERFORMANCE	PREMIUM PROTECTION AND DURABILITY
Excellent scratch resistance	Index Optimization
Longer-lasting cleanability	Superior scratch resistance
Anti-static	Longer-lasting cleanability
Anti-reflective for great clarity	Anti-static
HMC+	Anti-reflective for great clarity
	HMCX
